Provider/Nurse/Clinic collect:

- Under the Collect specimen tab, complete the three questions:

Tissue Specimens Change Performing Lab

Slide Lab: WYNN HOSPITAL LAB

BD Surepath Collection - snap device handle and drop the detachable head of the device into the Surepath vial. Place the cap on the vial and tighten. Send the Surepath vial to the lab for processing. Do not touch the head of the device while detaching. **DO NOT order an HPV test, one will be ordered if indicated on the HPV Reflex?**

Pap Mono Layer Screen (Pap Smear) Collect Later

Question	Answer	Comment
When was the patient's LMP?	2/15/2024	Enter a comment
HPV Testing?	Only if ASCUS and above Yes (cotest) Only if ASCUS and above	Enter a comment
Which methodology will be used?	SurePath	Enter a comment

A: When was the patient's LMP? – Add the last LMP date for the patient, if it didn't autocomplete.

B. HPV Reflex? – The clinician will complete in the order question section and it will crossover.

Choose **"Only if ASCUS and above"** if you would like HPV reflexed if the results are rendered as ASCUS or higher (i.e. ASCUS (Atypical squamous cells of undetermined significance, low grade squamous intraepithelial lesion (LSIL), high grade squamous intraepithelial lesion (HSIL), Atypical parakeratosis, Atypical glandular cells or rare atypical squamous cells).

Choose **"Yes (cotest)"** if you would like HPV ordered **regardless** of the pap smear test result.

C. Which methodology will be used? – SurePath is the preferred collection, but you can choose which type of collection vial you are utilizing.

Note: DO NOT order a HPV with Genotyping, PCR, Surepath test when you order a Pap Mono Layer Screen (Pap Smear) test. It will be ordered or not ordered within the laboratory automatically, dependent on how the "HPV Reflex?" question was answered.

Print Labels, label specimen, confirm collection of specimen and send to laboratory.
